CHAPTER V

CONCLUSION AND SUGGESTION

This chapter discusses the conclusions and suggestions of researcher from the results of data collection in research conducted by the following researcher:

A. Conclusion

Based on the results of the research, the researcher observed that obtained results and were able to describe the strategies applied by teacher in distance learning English through the Whatsapp group at MTs Alkhairaat Ampana Kota, as follows:

It can be concluded that the learning strategy used by the teacher during the two meetings was an independent study strategy with the teacher sending material and then giving assignments to students through the Whatsapp group for students to work on then the teacher waited for the answers to the assignments sent by students back to the teacher via private chat using Whatsapp media. Then there are three strategies that the teacher cannot apply in the distance learning process of English, namely the brainstorming strategy, the demonstration strategy and the small group discussion strategy because the teacher does not direct the students regarding the steps that the teacher should apply in accordance with the three strategies.

B. Suggestion

Based on the research results found by researcher, the research provides the following suggestions:

1. For English language teacher

The teacher should explain to students the learning materials that are distributed to students via Whatsapp groups so that students can more easily understand the assignments given and the teacher should provide more direction that can motivate students so that students can be more active in participating in the long distance learning process of English. done through the Whatsapp group.

2. For further researcher

It's good for students to try to get a good internet network so that students can follow the learning process through Whatsapp groups because learning English was also be useful for students in the future and not only that students was also miss a lot of subjects that are not followed via Whatsapp group.
