

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. Conclusions

According to the result of the analysis of the research in the previous chapter, it can be seen the average score of three components of writing procedure text got 67. It was fair category in writing procedure text. It can be seen from 30 students in VIII grade, there are 4 student are excellent, 4 students are good , 10 the students are fair, 5 students are low, and 7 students are very low. Thus It can be concluded that students get fair category in writing procedure texts because students have difficulty in writing. They lack of understand on how to compose sentences, use grammar, and also write mechanics.

#### B. Suggestions

After conducted and getting the final result of this research. The researcher had some suggestions that hoped could help in developing of this research for getting better.

1. For the students, they must learn much about procedure text, especially in writing procedure text. They must learn the grammar in writing procedure text.
2. For the teachers, after to know what is the difficulties face by students, the teacher should be creative in selecting interesting method and media in teaching learning process, especially in teaching procedure text. And because

the mechanis is the most difficulties face by the students, the teacher should teach mechanics deeply.

3. For the reader, the researcher realizes that this thesis is far from being perfect, because of that; contrastive critics and advice are really expected for the perfection of the thesis. Finally, the researcher hopes that this study can be useful for all of us.
