

ABSTRACT

MOH. IFAL A. LABULANO. 2020. Comparison of the Cost of Using Red Brick and Brick as Materials for the Construction of the Pulau Seram Shophouse in Poso Regency. Supervised by Marthen M. Tangkeallo and Ebelhart O.P. Pandoyu.

Keywords: Cost Comparison, Red Brick, Brick

This study aims to analyze the cost of shophouses using red bricks, to analyze the costs of a shop house using red bricks, and to compare the costs of a shop house using red bricks with a brick. This study uses the method of observation and literature study. Material data is adjusted to SNI 6897-2008 regarding brick and red bricks which is obtained from observations of the Pulau Seram shop houses. The cost analysis uses the unit price of Poso district 2020. The results of this study conclude that based on the unit price applicable in Poso district in 2020, the use of red bricks as material for building shop houses is more economical with a total cost of Rp. 27,689,446.00, while the cost of making walls using concrete blocks is Rp. 33,084,576.00.
