AGREIS RATODE.91811404122036. **Financial Performance of Village Owned Enterprises (BUMDes) of Pantangolemba Village in 2018-2020.** Supervised by Kisman Lantang and Tabita R. Matana.

ABSTRACT

The objective of this study is to evaluate the financial performance of the Village Owned Enterprises (BUMDes) of Pantangolemba Village. This study uses observation, interviews, and documentation as data collection methods. In terms of profitability ratio analysis (Net Profit Margin and Return On Equity), liquidity (Current Ratio), and solvency, the data analysis approach uses the financial ratio analysis method (Debt To Equity Ratio). The financial statements of BUMDes for the last three years, from 2018 to 2020 serve as the sampling method. Data collected was information from BUMDes financial statements.

Based on the results, the financial performance of BUMDes in terms of data analysis, the average profitability ratio which includes Net Profit Margin is very good because it is more than the standard that has been set, which is 45.31%, and Return On Equity on financial performance BUMDes has been very good because the average return on capital ratio is above the standard 67.07%. Then the liquidity ratio which includes the current ratio on the financial performance of BUMDes is classified as very good or healthy because it is more than the standard 2,517.7%. On the solvency ratio it can be concluded that the bar in terms of the debt to capital ratio Debt To Equity Ratio BUMDes financial performance is classified as not good because the debt-to-equity ratio is below the standard of 11.87%.
