

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusion

Based on the results of the research and discussion, it can be conducted :

1. STAD has a significant influence on student motivation and has an effect on student motivation 40.1%. Based on the results of statistical calculations using SPSS, it can be seen that H_a or the alternative hypothesis is accepted because there is an influence from STAD on student motivation and H_0 or the null hypothesis is rejected.
2. There are three the influences namely to improve learning outcomes and student enthusiasm for participating in learning as well as increasing students' sense of self-confidence

B. Suggestions

Several suggestions may be made based on the research that has been conducted as follows:

1. For School

It is expected that schools can use this research as a reference for finding the right learning model to apply in the classroom.

2. For Teacher

It is expected that teachers can use this research as information or reference, especially English teachers who use cooperative learning strategies.

3. For Students.

With this research, it is expected that it can increase student motivation through cooperative learning
